The definitive resource for global research

Web of Science®

**Access powerful cited reference searching and multidisciplinary content**

What it delivers ▶▶

- Coverage of 9,300 journals from 256 categories
- Backfiles to 1900
- Cover-to-cover indexing
- Cited reference and chemical structure searches
- Author identification tools
- Analysis capabilities
- Direct links to your full-text collections

What you can do ▶▶

- Search multiple disciplines and time spans
- Find high impact articles
- Uncover relevant results in related fields
- Discover emerging trends that help you pursue successful research and grant acquisition
- Identify potential collaborators with significant citation records
- Ease searching, writing and bibliography creation into one integrated process

Web of Science Homepage

One search delivers relevant, multidisciplinary results.

Discover the best results from the world's premier research literature

Web of Science provides access to the world's leading citation databases, with authoritative, multidisciplinary coverage from nearly 9,300 of the highest impact research journals in the world, including Open Access journals. You'll find current and retrospective coverage in the sciences, social sciences, arts and humanities, with backfiles to 1900.

Web of Science is available via *ISI Web of Knowledge*, the comprehensive research platform of choice for over 20 million users in 90 countries worldwide.

Powerful searching and analysis capabilities

Cited reference searching

Search across time and disciplines; track influence and monitor trends.

Cited reference searching

Citations (or footnotes) allow you to navigate forward, backward, and through the literature, searching all disciplines and time spans to uncover information relevant to your search. With cited reference searching, you can:

- **Discover** who's citing your research and the impact your work is having
- **Uncover** the seminal research of an important theory or concept
- **Measure** the influence of colleagues' or competitors' work – or your own
- **Follow** the path and direction of today's hottest ideas

Related Records® enhances the power of cited reference searching by searching across disciplines for all the articles that have cited references in common.

Analyze Tool

Find hidden trends and patterns, gain insight into emerging fields of research, identify leading researchers, institutions, and journals, and trace the history of a particular field of study. You can analyze results by author, publication year, journal subject category, institution, language or source title, and view a numerical, percentage and graphical representation of the analysis.
scientific.thomson.com

THOMSON™

Citation Report

Citation Report captures citation activity and identifies citation trends graphically within *Web of Science*. You can instantly create formatted reports for any general search of up to 10,000 records, and view vital citation information for an individual or an institution, such as sums of Times Cited, average citations per item and year, number of results found, and the h-index.

Author identification tools

A suite of authorship tools helps you quickly locate articles likely written by the same author, in a simple, single search:

- Distinct Author Identification System provides a powerful disambiguation algorithm that addresses the problem of similar author names throughout over a century of scholarly research.

- Full Author Names enables you to view full names as they appear on original articles.

- Author Finder helps you quickly distinguish between authors with the same name, and group an author's output when the name is recorded in several different formats.

Alerting and RSS Feeds

Keep up to date with the information that matters to you — by saving general, cited reference and chemical structure searches as email alerts. Or set up RSS feeds for saved searches and Citation Alerts. The feed comes in the form of an XML feed and contains author, title, and source information, as well as URL links to the full record.

EndNote® Web

Create bibliographies on the go with *EndNote Web*, fully integrated into *ISI Web of Knowledge* and freely available to any user. With *EndNote Web*, you can easily access and organize your references online as you search *ISI Web of Knowledge*, PubMed® and hundreds of library OPACs directly. You can send references to *EndNote Web* as you search, share *EndNote Web* folders with others, store references online between search sessions and transfer your files to *EndNote* on the desktop for further management.

Web of Science coverage:

- Contains over 39 million records

- *Science Citation Index Expanded™* — to 1900
  Fully indexes over 6,650 major journals across 150 disciplines

- *Social Sciences Citation Index®* – to 1956
  Fully indexes over 1,950 journals across 50 social science disciplines, as well as 3,500 of the world's leading scientific and technical journals

- *Arts & Humanities Citation Index®* –to 1975
  Fully indexes over 1,160 arts and humanities journals, as well as selected items from over 6,000 scientific and social sciences journals

- *Index Chemicus®* –to 1993
  Contains over 2.6 million compounds

- *Current Chemical Reactions®* – to 1986; plus INPI archives from 1840 to 1985
  Contains over one million reactions
